

Olympus

Maincrop

(Atlantic x 12601AB1)

Consumer quality

High yielding, maincrop crisping variety suitable for long term storage. Uniform round shape, pale fry colours, high dry matter and low defect levels deliver high crisp yields.

Independent testing has confirmed the production of extremely low levels of acrylamide during processing.

Agronomic features

Resistant to *G.rostochiensis* and partially resistant to *G.pallida*. Highly resistant to Common scab; good resistance also to Powdery scab, Blackleg, Skin spot and Dry rot. Good resistance to bruising and splitting.
